

Marrutt 260gsm Exhibition Polyester Matte Canvas

marrutt.com/canvma

Paper Description

This popular canvas has a smooth surface with a polyester base. The tight weave surface makes this an ideal paper for stretching over wooden frames.

Fast drying, scratch and water resistant coating. Impressive colour gamut, fine detail and deep blacks.

Used by numerous high-end professional photographers and designers worldwide.

Ink Type:	Pigment and Dye

Paper Handling:

Unless the paper is loaded in the printer about to be used, your paper should ALWAYS be kept in its box with the lid on. In use, avoid touching coated surface before & after printing and wear cotton gloves if necessary.

Storage advice:

The paper should be kept indoors in a dry environment away from extreme temperatures. The recommended storage temperatures are 15° to 25° C (60° to 77° F) and / or in the dark, with humidity being low, from 40 to 60 percent. Prints should be allowed to dry in air, ideally left uncovered for 24 hours. In cases where stacking is unavoidable, a paper / tissue interleaf should be placed between each sheet.
